Personal Statement

I am a Computer Science student at the second year of my college. I am a dedicated, hard-working and a self-confident learner possessing an innovative and creative mind with high problem solving skills. I am a person who has the curiosity gene to dive into diverse areas of my interests and explore them expanding my horizon of knowledge. I have a strong interest in the area of Reinforcement Learning and tackling climate change with AI. I am an optimistic student who believes in the power of AI in changing the world for good. Besides these, I have a genuine interest in developing open-source software and projects. In addition to these skills, my positive friendly nature, the ability to work with others as a team and communication skills, lets me complete tasks assigned to me early and successfully. I aspire to contribute meaningfully to the AI community, focusing on research that can positively transform our world.
